

# SCWT DATABASE USER'S GUIDE

---

Finding information on Dogs, Litters and  
People and using Reports

*March 2017*

## Welcome to the SCWT Database...let’s get started...

The best way to learn how to use the Database...and appreciate everything it has...is to just jump in and start looking around. Here’s a Guide to get you started.

Whether you’re looking up a dog, a person or a litter, you’ll start by searching for them. It’s pretty simple.

Here are some tips for each...

- **Dogs:**

- You don’t have to use an apostrophe for the kennel name....”Rover” will return “Rover Super Star” or “Rover’s Super Star” or “Rovers Super Star”
- Do **NOT** use titles (e.g., CH)
- Use a “**Contains**” search if you’re not sure of the spelling...”Rover Sup” will return both “Rover Super Star” and “Rover Supre Star”

- **People/Vets:** Names can be difficult, especially if you’re not sure of the spelling

- Avoid using apostrophes
- You can use an asterisk (\*) as a wild card...“J\*n” will return “Jon” and “John” and “Jensen” and “St. John.”

- **Litters:** Breeders may not be in the database or linked to dogs. So there are other ways to search. Try:

- Looking up the sire or dam
- Using the exact whelping date or year

## Reports

There are 10 standard reports users can run from this tab. The best way to see their value is to try them out!:

- **Health Search:** Returns a list of dogs with the selected health information in their records. Users can do a text search or select from a drop down list of conditions.
- **Certification/Test:** Returns a list of dogs with the specified health certifications, such as OFA, CERF, the PLN Variant Gene DNA test, etc. Users can narrow the search by findings, gender and date.
- **Litter Certs by Country:** Returns a list of dogs in a litter. Users can specify the litter number or select all. The search can be refined by country, year whelped, health certifications and choice of sire or dam.
- **Trial Pedigree:** Users can create a trial pedigree for planning litters. The page provides a look up function for the sire and dam. A 4-generation PDF pedigree is produced and can be downloaded.
- **Owner Report:** Users can look up an individual and see all dogs they own/co-own. There are 2 types of reports, with the **Full** report containing all information on the dogs.
- **Breeder Report:** Users can look up an individual and see all dogs they have bred/co-bred. The **Brief** report lists the litter information and names of all members of the litter. The **Full** report provides greater detail on the sire, dam and offspring.
- **Offspring Report:** Users can look up a dog and see all its offspring from all litters. The **Brief** report lists the litter information and names of all members of the litter. The **Full** report provides greater detail on the sire, dam and offspring.
- **Stud Finder:** Breeders can search for available stud dogs based on a number of criteria, including age, frozen semen, attributes, certifications, location and title.
  - **NOTE:** dogs whose owners have not indicated their dogs are available at stud will not be included. Please visit this page for more information on the Stud Finder: <http://scwtodb.org/DB/images/StudFinderIntro.pdf>
- **DNA/Research Studies:** Lists all existing research studies involving Wheatens.
- **DNA/Research Dog Search:** Returns a list of all dogs in the database participating in the selected study. Participation information was provided by the owner and **cannot** be independently verified.
